Barometer of mobile Internet connections - World Wide - Large Countries

04/01/2025 - 03/31/2026

Expert in the telecom network optimization

nPerf is an independent French company based in Lyon (France). For over a decade, nPerf has been a trusted partner for both fixed and mobile operators, providing comprehensive network testing solutions and analysis. Our mission is to accurately measure, evaluate, and enhance the understanding of Internet connectivity around the world.

 **300k+** tests daily
worldwide.

 **26Md+** coverage
scans in total.

 **3k+** servers all
around the world.

Test your Internet connection with nPerf!

nPerf allows you to test the quality of your fixed, mobile, or Wi-Fi Internet connections up to 10 Gbps! Download our app or visit our website!

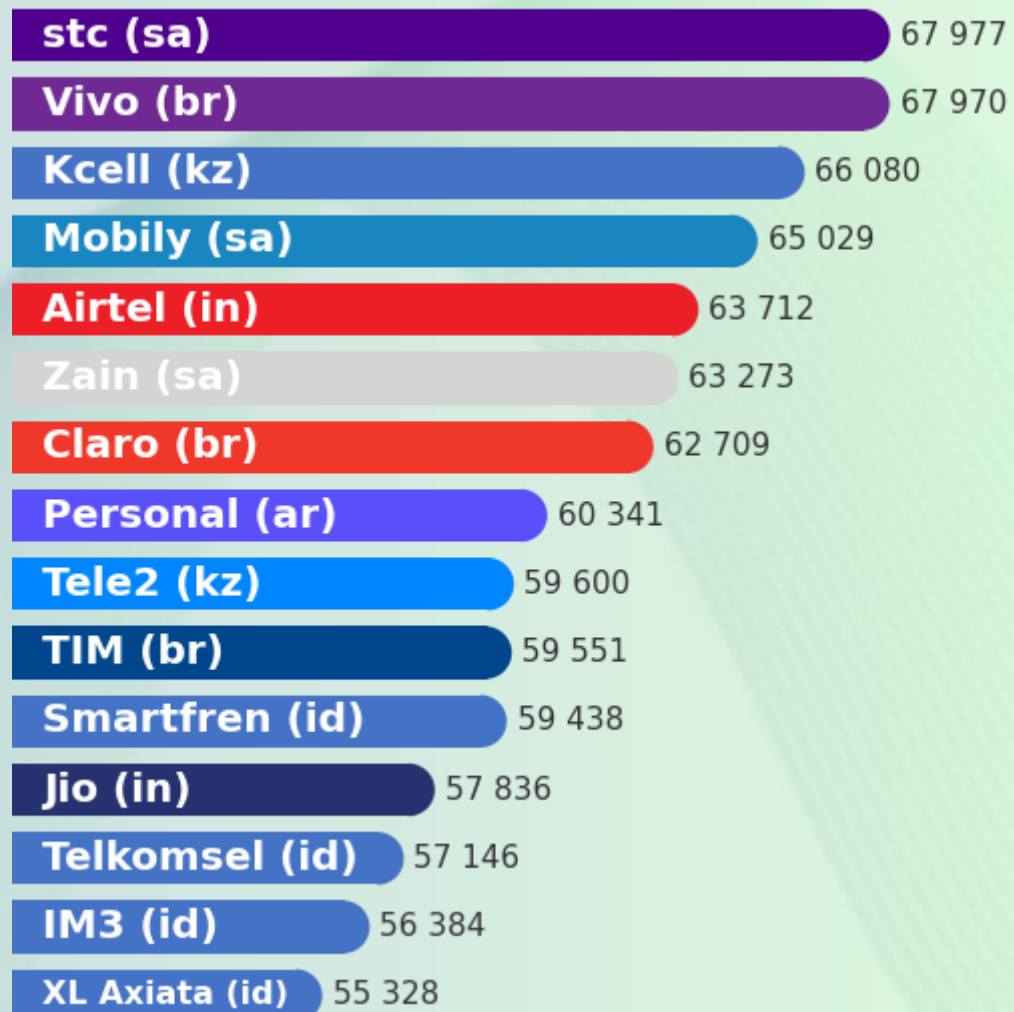

This report presents a comparative analysis of mobile network performance across a selection of large size countries, defined for the purposes of this study as territories spanning over 1,500,000 square kilometres. The 10 countries included in this analysis are: Brazil, India, Argentina, Kazakhstan, Algeria, Democratic Republic of the Congo, Saudi Arabia, Mexico, Indonesia and United States.

All data presented in this report was collected in accordance with nPerf's established measurement methodology for mobile network performance. The dataset encompasses all tests conducted between April 2025 and March 2026, representing a full twelve-month measurement cycle. Only tests meeting nPerf's quality and validity criteria were retained for analysis, ensuring that the figures reported herein reflect genuine end-user experience rather than isolated or anomalous measurements.

Mobile network performance was assessed across the standard set of indicators defined by nPerf's methodology, including download, upload, latency, Browsing and Streaming. Tests were carried out by users through nPerf's dedicated measurement. The volume and distribution of tests across the measurement period ensure statistical representativeness at the national level for each country included in the study.
